LADIES AND GENTLAMEN.—
I beg to offer myself as a candidate for the position of Honorary Surgeon to your institution, to become vacant in Honorary Surgeon to your institution, to become vacant in February.

My professional studies were chiefly carried on during six years in King's College Hospital, London, and in the Edinburgh University, at which seats of education I took henours in several subjects. During my career I have had the advantage of acting as assistant in public and private practice to Sir William Fergusson, Bert., Serjeant Surgeon to the Queen, to Mr. Critcheti, the Oculist, and to one or two other surgeons of European celebrity.

I have enjoyed opportunities for studying the practicely hospital and the Royal London Ophthalanie Hospital, Moorfields: have studied the diseases of women in the Rotunda Hospital, Dublin; and have also followed the practice of eminent surgeons in St. Potersburg and in Paris.

During the past twenty years I have been continuously engaged as Medical Tutor, in hospital and private practice; and, in the course of my career have, from time to time, spentaneously underlaken work which has been productive of important results to medical and surgical science, and to the public weifare.

The account of my investigations into the properties of the SYDNEY PERMANENT FREEHOLD LAND AND BUILD-101 AND AND BUILD-102 AND AND BUILD-103 AND CHARLENT,—As I believe I can be of service in furthering the prosperity of our Society of the SYDNEY PERMANENT FREEHOLD LAND AND BUILD-103 AND CHARLENT,—As I believe I can be of service in furthering the prosperity of our Society of the SYDNEY PERMANENT FREEHOLD LAND AND BUILD-103 AND CHARLENT,—As I believe I can be of service in furthering the prosperity of our Society of the SYDNEY PERMANENT FREEHOLD LAND AND BUILD-104 AND AND BUILD-105 AND CHARLENT,—As I believe I can be of service in furthering the prosperity of our Society of the SYDNEY PERMANENT FREEHOLD LAND AND BUILD-105 AND CHARLENT,—As I believe I can be of service in furthering the prosperity of our Society of the SYDNEY PERMANENT FREEHOLD LAND AND BUILD-105 AND CHARLENT,—As I believe I can be of service in furthering the prosp

the public weifare.

The account of my investigations into the properties of the Bromides of Potassium, Ammonium, and Cadmium, read at the London College of Physicians in July, 1866, revealed the value of these drugs to the Profession.

My systematic visitation of the Cholera Hospitals of Cronstadi and St. Petersburg during the last epidemic (the report of which was published in England, at the instance of the Medical Department of the Privy Council) made known important facts in the treatment of the disease, and in the management of similar epidemics.

Before the Cottage Hospital system was introduced in England I was engaged in the same work; and at my suggestion the second (and one of the most successful) was founded.

Inded.

Though the credit of the introduction of the Biher Spray

Though the credit of the introduction of the Ether Spray for the purpose of alleviating the pain of surgical operations is justly due to my distinguished friend Dr. Richardson, it was devised by myself contemporaneously, in entire ignorance of the experiments of, and before my acquaintance with, that gentleman.

I mention these facts (to which could be added several others of nearly equal interest) simply to indicate what might be expected, if opportunities for study and usefulness offered in an institution so important as the Sydney Infrarry were available to me.

If elected to the office, I should carnestly endoavour to uphold the present high character of the institution, to promote its utility, and to fulfil all the duties of the position to the utmost of my ability.

I am the more anxious to obtain the honour at your present disposal, and shall the more highly appreciate the support which you may accord to me in the election, from the conviction that the recent renovations and additions, secured by the stal and judgment of the directors and the liberality of Parliament, have now placed the institution in a condition which offers the prospect of a bright future for the alleviation of suffering and the successful cultivation of modical and surgical science in the colony.

I have the honour to be,

Ladies and Genetleman,

Yours most faithfully,

THOMAS B. BELIGRAVE.

Jury: Messrs. A. Crufeshemk, B. C. Cree, W. J. List, and John Septist.

Mr. M. H. Stephen, and Dr. Donovan, instructed by Messrs. Lipsocrab and Blazhard, by Messrs. Lecton and Fatthril, appeared for the plantial; Mr. W. J. Foafer, instructed by the agent for Mr. Dawson, for the defendant. Allred Sandoman, official assignse of the insolvent estate of George Yonge Mould, sued David Lazarus for detaining certain printing plant and machinery used for the printing and publishing of the Coona Gacetts by the insolvent. There was also a count in trover for the same goods. The defendant ploaded:—I. Not guilty. 2. That the goeds were not the plantiff's as alleged. 3. Before the alleged detention and conversion the goods in question were then delivered by him to the defendant, to be kept him as security for and until the repayment by George Yonge Mould by the defendant. At the time of the alleged detention and conversion, the sum of £228 and interest remained unpaid, wherefore the defendant and the two goods in question were the Gootse Gazette, for the purchase of which he borrowed from the defendant £228s. The insolvent was the proprietor and publisher of the Cootse Gazette, for the purchase of which he borrowed from the defendant £228s. The insolvent also became indebted to a Mr. Waliace for a sum of money paid on a guarantee given by that gentleman to the bank. The defendant, eighteen months afterwards, seeing that the insolvent was not making the paper pay, obtained a bill of sale, dated 16th January, 1870, over the printing press, type, &c., employed in the publication of the paper. When Wallace heard of the Mll of sale, he caused a writ to be sale, dated 16th January, 1870, over the printing press, type, &c., employed in the publication of the paper. When Wallace heard of the bill of sale, he caused a writ to be sale, dated 16th bill of sale was given, according to the defendant, before the shelf o

BUBPY V. FOSEPH AND ANOTHER.

Jury: Mesers. J. List, B. Palmer, J. Marks, and E. C. Cree.

Mr. Shupson, instructed by Mr. Greer, for the plaintiff; Mr. M. H. Stephen, instructed by Mr. Ashdown, for the defendants.

Enally Rabbe sucd Morion Joseph and Joseph Joseph, hotal brokers, for not accounting to the plaintiff for the sale of the stock-in-trade, good will, &c., of a certain hotel of the plaintiff. There was a second count for not accounting as a broker; also a third count for money had and received.

£500 wist claimed.

The defendant pleaded—1. That he did not promise as alleged; 2, that he did render to the plaintiff a true and just account of the sale; 3, that he paid the money arising from the sale to Mesers. Burrows and Glescon by order of the plaintiff; 4, never indebted; 6, that he satisfied the plaintiff a claim by payment.

The plaintiff was he holder of the license of the Barry O'Noll Hotel, at the top of William-street, Woolloomooloo, over which Mesers. Burrows and Glescon held a bill of sale to secure the sum of £250 with further advances. The plaintiff put the hotel into the hand of the defendant, Morion Joseph, for ade. The sale was effected for £446 is. After deducting his commission, £20, the defendant paid the blance, £254 iss., over to Mesers Burrows and Glescon, as the defendant affected, in accordance with the plaintiff's instructions. The plaintiff denied that she ever gave any such instructions. On this part of the case the evidence adduced by the parties was directly contradictory. The plaintiff's witnesses detailed conversations which the defendant and his witnesses wore never took place. On the other hand defendants' witnesses remembered conversations and needings which were nover held. At the date of the sale the salantiff was indebted to Mesers. Burrows and Glescon for about £440.

After counced and directed the jury that the question for their consideration was did they plaintiff's abould succeed.

The jury, after retiring, found a vestlict for the plaintiff, with deniender.

ordered each party to pay his own costs.

Several ca. sa. motions were disposed of.

BIONNIL V. BOWREY.—Breach of warming of a horse.
In this case plaintiff purchased a horse from defendant by exchange, which however, did not suit, and it was exchanged for two others consecutively for trial, both of which were proved to be in the habit of jobbing. The contrast was that plaintiff was to be suited with a horse, but whan the last horse was returned the defendant said be would not trouble about getting more horses for him to try. His Hostor, after the arms evidence in the case, gave plaintiff a writter for £10 14s., with costs. Mr. Pigett appeared for plaintiff, and Mr. Want for defendant.

In the case of G. Young v. Francis Rogers, demayed for assemble, £50, plaintiff did not appear, and Mr. Hoberts, who appeared for defendant, applied for and obtained on behalf of his client an order for £6 cs. costs.

In the case of H. E. Holmes v. H. Parkinsen, monty due and lent, £10 1s. Sd., the defendant did not appear, and as the plaintiff proved his case he get a verdict for the full amount claimed, with costs.

FROM OUR CORRESPONDENT.]

For the last two or three days the weather has been exceedingly oppressive. Heavy clouds have been visible, and the atmosphere evidently overcharged with electricity, giving rise to hopes that it would culminate in a thunderstorm accompanied with a good downpour, now so much needed. Beyond a few faint flashes of lightning, and occasional rumblings of distant thunder, these anticlepations have not been realized. A change of wind took place on Monday night, when a violent hurricane, accompanied with blinding clouds of dust, lasting about half an hour, was experienced. On Tucsday the atmosphere was again close and muggy, and the weather remains unsettled; but, in the face of frequent disappointments recently experienced, it is useless to speculate on the probability of rain. Such a severe season has not been experienced for many years, and unless copious rain falls within the next month or six weeks pastoral prospects for the winter will be most discouraging. From the Urana district it is reported that dry weather continues, and that stock there are starving. No transactions in stock have taken place at Deniliquin since my last letter, and the only stock movement reported are 1500 ewes from Zara station, trucked for Melbourne, and 20 head of cattle (Taylor's) for Sandhurst.

The Sydney Morning Merald.

SATURDAY, FEBRUARY 17, 1877.

In the Legislative Assembly, yesterday,
Several questions were asked, the replies to which
will be found in the report in chief.
Messages were read from his Excellency the Governor, recommending provision to be made in accordance with the 54th section of the Constitution
Act for carrying out the objects of the Diseases in
Sheep Act Amendment Biff and a Temporary Supply
Bill for the months of February, March, and April,
1877.

Conference, in favour of the bill for closing publichouses on Sunday.

The petitions were received.

Ministers laid upon the table the following documents, viz.:—Return showing minutes, &c., having reference to reserves for water supply. Return showing number of reserves granted on W. J. Dangar's station, and also on Dangar, Brothers' station; and instructions from Surveyor-General to surveyors.

Ordered to be printed.

Mr. Farnell brought up the report from the Select Committee on Throsby's Leasing Act Amendment Bill.

It was ordered that the document be printed.

Mr. Davies moved the second reading of the Sale of Liquors Licensing Act Amendment Bill. The principle of it was similar to that known as the Forbes-Mackenzie Act, which had been in force in Seotland for twenty-four years, and which had been the means of effecting a great deal of good. The bill proposed the closing of all public-houses on Sundays, in the same way as butchers, bakers, and other tradespeople were compelled to close their shops. A great deal of crime, pauperism, and disease resulted from the traffic in intoxicating drink. A law similar to that which he proposed was in force in Victoria, and as it had been found to work well in that colony there could be no harm in trying the experiment here.

Mr. Firzparnex felt it his duty to vote against the bill, as it was the thin end of the wedge of tyrannical legislation. The evils resulting from strong drink, which had been so vividly pictured by the hon, member Mr. Davies, had nothing to do with this bill, and would not be prevented by it even if it became law. As to the experience of Victoria it was nonsense to talk about that, as the law in Victoria was nonly three weeks old. The bill would only affect the poor men and would not touch the rich. The petitions which had been presented in favour of the bill were not the spontaneous expression of public opinion. If the evils of drink were so great, as represented by Mr. Davies, and he (Mr. Fitzpatrick) did not attempt to deny it, why did not the h

better, and he would vote against it.

Mr. MACINFOSI supported the bill. It would
not do any harm to society or to the poor
man, or to anyone who deserved protection. As
to not voting for compulsory laws nearly all our laws
were of that character. The bill would impose no
more restrictions on the publicans than was imposed
on other tradesmen

Mr. M. FLHONE was opposed to the bill. If any change were required in the licensing law, it was the duty of the Government to introduce it. He agreed with the member for the Tumut as to the necessity for greater discrimination being exercised in the granting of publicans' licenses. As far as he was concerned, he should wish to see the importation of liquors into the colony prohibited altogether.

Mr. Stlant intended to vote for the bill. He did not see why it should be set aside merely because it did not go far enough. The bill would not affect the rivenue, and, therefore, there was no necessity for the Government to introduce it. The object of the bill was to check the evils of intemperance, and if it effected this, even to a small extent, it would be doing good. He thought that upon the whole the balance of argument lay with those who supported the bill.

balance of argument lay with those who supported the bill.

Mr. H. C. Dangar considered the restrictions which at present existed as to Sunday traffic in liquor were amply sufficient to secure the sanctity of the Sabbath. He looked upon the bill as one which would be a reproach to our Statute Book, and as utterly unnecessary, and, therefore, he should vote against it.

Mr. Greville said that although a more comprehensive measure might have been introduced, etill as he believed that the bill before them would do something towards the diminution of interaperance, he was willing to give it a trial. The argument as to the bill interfering with the liberty of the subject had no force in it, as the present fact reagacted the sale of liquors within certain hours on the Sunday.

The second reading was negatived on division by 16 to 13.

to 13.

The order of the day was then discharged and the bill withdrawn.

Mr. Dress, without notice, asked the Colonial Secretary, in the absence of the Postmaster-General, if the Government had sanctioned the deviation of the Californian Mail Service from the original forked route.

Californian Mail Service from the original forked route.

Mr. Robertson said that the Government had sanctioned a temporary deviation in consequence of one of the company's ships having been placed in quarantine. Negotiations were, however, going on between the Government of this country, the Government of New Zealand, and the company for a change in the service.

The House went into Committee for the further consideration of the Ad eundem and Honorary Degrees Bill. Clause 1. "Degrees may be granted in certain cases to graduates of other Universities."

Mr. Stylar moved the omission of that part of the clause which provided for the granting by the University of Sydney of degrees to those persons whe had passed the statutory examination, or otherwise duly qualified themselves for degrees in other Universities. After debate the amendment was agreed to without division.

Mr. Dunns moved a further amendment restriction.

chained themselves for degrees in other Universities. After debate the amendment was agreed to without division.

Mr. Dires moved a further amendment restricting the granting of ad emoles degrees to such universities as reciprocated the privilege.

The amendment was negatived by 25 to 6. Ultimately the clause was amended by the insertion of words restricting the privilege to the Universities of Great Britain and Ireland, and such other universities as reciprocated it. The clause as amended was then agreed to. Clause 2, "Hondrary degrees," was negatived without amendment. Clause 3, "Master of arts degree," was carried on division by 16 to 11. Clause 4, "Right to vote when conferred." Clauses 5 and 6 were passed, with an amendment in clause 6.

Mr. M'ELHONE proposed a new clause, providing for the abolition of fees. The Chairman ruled that the clause was irrelevant to the bill, and therefore could not be put. The Speaker, upon appeal, confirmed the Chairman's ruling.

The preamble having been agreed to, the bill was reported to the House, with amendments.

Mr. Winderer moved, as an amendment, that the bill be recommitted, with a view to alter the title, and to insert a new clause similar to that which, had been ruled out of order.

The amendment was negatived by 23 to 2, and the report adopted.

The House adjourned at half-past 12 s.m. to 4 p.m. on Tuesday next.

RECENT events have given us a special local interest in the question as to how best to diswere not the spontaneous expression of public opinion. If the evils of drink were so great, as represented by Mr. Davies, and he (Mr. Fitzpatrick) did not attempt to deny it, why did not the honorable member bring in a bill to prevent the sale of intoxicating liquors altogy, ther? He would not vote for compulsory laws of any kind whatever.

Mi. Fonstran said that he was tectotally opposed to the fall because it was not calculated to do any good, but on the contrary would do a great deal of harm. If the mover of the bill was sincered he would bring in a measure which would grapple with the whole question of intemperance. If anything effectual were to be done we should go to the root of the evil and prevent the manufacture and such of adulterated liquors. We ought also to get in of the present system of licensing public-houses.

Mr. Darvan would like to hear the opinion of the Government on this matter. If Sunday traffic in intoxicating liquors was so extensive as it had been stated to be by Mr. Davies the law as it stood at present was sufficient to punish those publicans offending in this respect. The bill proposed would not effect the object in view, and was a sham in more ways than one. Every one who had the prosperity of the country at heart must wish to see the evils of intemperance difficulty that would command universal assent has yet to be sought. In fact, we are now face to face with a problem which for years past has been puzzling practical and scientific men in the mother-country. England is the foremost of all countries in the question as to how beat to discussion of the difficulty that would command universal assent has yet to be sought. In fact, we are now face to face with a problem which for years past has been puzzling practical and scientific men in the mother-country. England is the foremost of all countries in the question as the object of city drainage and its influence on public health enlisted the services of the fact that there is in England less centralization and more ladividualism than papers, the great problem is still unsolved. London, the biggest of cities, is perhaps the

proper destiny for the excreta of great cities is the land. Only thus can the great cycle of the natural operations be fulfilled, and the fertility we draw from the soil be returned to it. How to do it with economical results is the difficults. Therefore the constitution of the proportion of the pro results is the difficulty. There is a story told of an old menk, who used in his prayers to find a subject of special gratitude in the fact, that Divine providence had placed large rivers near large towns. These rivers have been not only used as sources of water supply, but as great arterial drains. The drinking water came out of the river above the city, and the water below the town was polluted with water below the town was polluted with its sawage. This was a cheap and easy way of getting rid of the noxious surplus. But by-and-bye it was found intolerable. Legal proceedings commenced for the abate-ment of the nuisance, and legislation stepped in to compel towns to provide an innocuous disposition of their refuse matter.

A great variety of schemes has been adopted, and a still greater variety suggested but they all divide themselves in the first instance into two: first, manual transport; and, secondly, mechanical transport. The first is tedious and expensive, but it has the merit of applying the offensive matter immediately to manurial purposes. If dirt is matter in the wrong place, this kind of matter becomes in the right place the moment it is used to assist vegetation. But in this mechanical age this manner of dealing with city sewage is intolerable, and mechanical means are inevitably suggested. At present these means are two-fold; first, carriage by mese means are two-fold; first, carriage by water-power; and, secondly, carriage by air power. The former is the mode ordinarily employed, and it has the advantage of being very simple and very cleanly. It is, however, accompanied by its disadvantages, and these may be said to be threefold. In the first plabe the quantity of water used is contained and in the cause of primary iderable, and a great drain is established on the water supply of the city. This is not, perhaps, of very material importance where water is superabundant and cheap; but there water is superabundant and cheap; but there are not very many cities of which that can be said, and those who have to furnish the water and consolidated revenue derived mainly from a consolidated revenue derived mainly from employed, and it has the advantage of being said, and those who have to furnish the water make a serious matter of the large amount required for getting do nestic sewage into the great sewers, and then for flushing these sewers. In the second place, the system has developed a very large tion upon the ratepayers. The matepayer is

conted out certain defects in the bill which would cuder it inoperative.

Mr. M. Filmons was opposed to the bill. If any hange were required in the licensing law, it was the luty of the Government to introduce it. He agreed with the member for the Tumut as to the necessity or greater discrimination being exercised in the granting of publicans: licenses. As far as he was concerned, he should wish to see the importation of liquors into the colony prohibited altogether.

Mr. Stlant intended to vote for the bill. He did not see why it should be set aside merely because it did not go far enough. The bill would not affect the did not go far enough. The bill would not affect the difficult to turn it into portable manure at a difficult to turn it into portable manure at a difficult to turn it into portable manure at a

paying price.

It is to meet these objections that Mr. Lumnum has produced his system of air carriags.
He drives the offensive matter away, not by
water, but by air power. This has the
advantage of tilling all the drains with sweet
air, and diluting the exhalations of norlous
games. It involves no waste of water, and gases. It involves no waste of water, and gases. It involves no waste of water, and simply employs a fluid that costs nothing, and which is laid on by nature. But the plan, though applied to one or two cities on the Continent, is said to be expensive and somewhat complicated, and it still leaves open the necessity for ordinary drains and sewers for surface refuse.

present, and it is clear that we do not see our way as yet how to turn all the sewage of the city into manure at a cost which shall either be repaid by the value of the preduct, or leave no heavy burden on the taxpayers. Apart from using it as manure it is difficult to put sewage anywhere where, sooner or later, it will not in great volume became a nuisance. In England that have found out that it cause segments they have found out that it causes a great pollution of the rivers; in Sydney we have the most capacious harbours in the world; what would be its effects on the sea-shore we have yet to ascertain. In any case, however, whether we throw it into river, harbour, or duct, and so far as the suburbs of Sydney are concerned, we lose it in a district shere the land being for the most part not very rich and absorb all that can be provided. But at the present moment it does not pay the cultivators metropolitan authorities can afford to sell.

THE second triennial election of the London School Board took place on the Oth of November last, under circumstances of great interest. There were fifty members to be elected, and seventy-nine candidates prosunted themselves—some few unattached, but the greater number representing or supported by rival parties who had been for some time preparing energetically for the contest. Some have expressed doubt as to the wisdom of the system that renders the question of primary education liable to be the subject of agitation and party strife so frequently. But, whatever ber last, under circumstances of great interest. and party strife so frequently. But, whatever may be said upon that point, this election has shown beyond dispute that the ratepayers both value the power of control which the law now gives them, and are quite cising it. Looking to the number polled, and, making allowance for the camu-lative vote, there were on the whole more electors who took part in this election than is usual at ordinary Parliamentary elections. A continued display of interest like this, if it should be witnessed under less exciting circumstances, would go far towards supplying a solution of the doubts referred to. On this occasion, however, there were issues raised which gave the struggle an exceptional character.

When Lord SANDON'S Education Bill wa. before the Imperial Parliament last year, it was evident that some at least of the support given to the reactionary clauses introduced into it rested on a belief in the existence of a strong reactionary feeling outside against Board Schools and School Boards. Lord Sandon himself imprudently pointed to it, with the apparent purpose of warning the opponents of reaction that if they re-fused to make small concessions volunfused to make small concessions voluntarily, larger ones might before long be extorted by sheer pressure. This feeling has been strong in London; and, although it was not a question there whether a School Board should or should not be called into being—the Act of 1870 having provided for that—there was plenty of scope for its operation in fighting out the issue, which would be found supporting him.

Mr. Charles protested against the House interfering with the description of food or drink a man might choose to take. Supposing that the present might choose to take. Supposing that the present law was infringed, this Act would make things no better, and he would vote against it.

Description of food or drink a man sewage is wasted.

Theoretically no one can doubt that the metropolitan district, the Board School bearing in the food of the sewage is wasted. for London under the Act of 1870, the under nominational, or Board School party, had the had considerable influence, and held its oppo-nents to a considerable extent in check At the last election a vigorous and organized effort was made to shift the balance to the other side. It was met by counter-org tion and the appointment of a Defence Com-mittee. And hence, at least in part, the remarkable display of general interest in the

It has provided thoroughly efficient schools for 182,000 children; and through its agency the average attendance of shildren is alaman. the average attendance of children in elemen-tary schools has been raised from 175,000 to 300,000 within the last five years. During the same period, the attendance at voluntary or Denominational schools has been increased to the extent of 40,000 children at the expense of the Exard and by the action of the school messengers. The Board has suc-ceeded in a large measure in clearing trusts from the streets, and the police authorities now state that juvenile criminality is rapidly diminishing.

KILLED BY LIGHTRING.—The Ballarat correspondent of the Geelong Times states that during the thunderstorm that burst over that city on Monday night a young lady, mamed Catherine Nicholaon, 18 years of age, was struck dead by lightning. She was taking a horse to a paddock on the Crowick Read, near Mount Rewan, when she was struck. Her apparel was torn to threads, and the body burned and blackened fearfully. A tremondous fissure was made on the road close by the body by the electric fluid.

The body was found by the father shortly afterwards.

THEATRE ROYAL,—Last night the drama "Rag Fair" was repeated, and will be again performed to-night. There is nothing to add in the way of commendation to the first notice of this play. The scenery is unaxceptionable, and the scenery is the only really good point made in this production. The acting is tolerable; but the fault throughout is that there are good situations in the play which are not made effective. Criticism would be altogether thrown away on the performance, and perhaps the best thing that can be said is that the drama will be performed for the last time this ovening. The low level road had been finished, and they now asked the Government to carry out the continuation of the high level road as then contemplated; to place a dwarf stone wall with iron rail at one side, for the protection of the public; and, on the other side, to put back the ricketty fence which now existed. Mr. Robertson said that he did not know of any agreement to carry on the high level road. He did not think that there was such an agreement, but he would look into the matter. Alderman Moore said that he was not sure that there was any agreement on the part of the Government to carry out the work; but he believed there was. At all events there had evidently been at the time an understanding that the Government would carry on the high level road. Alderman Davies said that even if there had been a supported to the control of the control of the public interest should be looked into. Mr. Robertson did not dispute that, and should look if an agreement existed, or if there was a rocter on agreement the matter was one which in the public interest should be looked into. THE EXPORT MARKET, — No appreciable charge has occurred since the departure of the mail via San Francisco. As was then indicated, there is level disposition to buy wood than there was last mouth, and medium grades have not understantly existing as to the probable course of Condon sales, which open on Tuesday next, will not be settled when next week's auctions lake piace, which open on Tuesday next, will not be settled when next week's auctions lake piace here, so that we can hardly look for any alteration in the existing tone of our market until it is inluenced by callengam reporting the range of prices at the February series. The Paramanta sailed this week, but is unlikely to arrive in time for the May yales, and the only addition to the simpments advised by last mail as intended for these and will be the sa. Nomesis. The carge of the Paramanta comprises 3103 bales wool, 7086 flagots tin, 357 calcus 1856 ingots copper, 248 bags nickel ore, 10 casks 356 cances pearlaball, 160 cases preserved means. The recepts of wool are falling off so rapidly that the necessity for weekly sales will not exist much longer. About 2-200 bales were offered this week, and about two-thride changed hands, ancluding the following parcels:—

Breadstuffs and Cerrals.—The transactions of the week include the quittance of a large shipment of Californian wheat on private terms, said to be not less than be. 4d. For Adelaide, 6s. 9d. was refused, and some agents lectine to name a figure. Flour is in sueady demand for rade use at from £16 15s. to £17, terms. Oats firmer, 2s. to 3s. 2d. asked for New Zeakad. Maize is plentiful; superior samples of old are worth as high as 2s. 10d.; inferior from 2s. 3d. upwards.

Building Materials.—Cement still ruses low, 16s. being the top price for best. Lumber in full supply, and dull. The carry of Oregon ex Weelthy Pendleton is in the market fo, public sale next week. Shues are scarce and pommanad extrano figures. £20 was paid for 20 x 10.

CANDLES.—Five-medal are not too plentful, and cholders sak 10dd. for trade quantities; inferior are worth 10d. to 70d.; ii.ght-weights, £4d. to 9d. The consumption of polonial-made is increasing, and the quantities given in home export returns no longer form a safe guide as to the condition of the ordenial market.

Copper and Curount.—A light demand exists for plantation cofice at 1s. 2d., and — vive at 11kd. Chicory hull, at 24d., for base.

Sales of tartaric acid at 1s. 11d.; flour sulphur very dull, quotations nominal. Blasting powder is firm at 54d. to 6d.

DUNDER GOODS.—Sales of comsacks continue at 9s. to 9s. 3d. Woolpacks quiet, at a first 3s. for full weights. Twine in limited supply; 10d. to 13d. asked. There has been more inquiry for carvas. Prices as before.

Firm.—The demend has slackened. 1-1b. salmon sold at 11s. 6d. to 12s. 6d.; bulk scarce. Oysters plentiful, at 6s. 9d. to 7s. Lobsters have advanced to 10s. New dried ling is held for 64d.; old offered at 5d. White herrings in short supply; best are worth 37s. 6d. Sardines quiet; 7s. 9d. for halves, and 4s. 9d. to 5s. for quarters are full rates.

FRUITS.—The market remains weak. Prime samples of currants sell at 55d.; dates are worth 34d. to 3d.; figs. 75d. to 8d. There is a good stock of Barcelona nuts, and nothing above 5d. can be obtained. Muscatel misins are nominal, Eleme quotable at 6d. to 6d.; saltanas, 7d. to 7d. Jordan almonds have fallen to 1s. 6d., and dried apples to 8d. A fine sample of apples, pears, and plums, dried by the Alden process, came to hand from California by this month's mail stomner.

DESTRUCTIVE RAILWAY ACCIDENTS IN VICTORIA.

VICTORIA.

VICTORIA.

From the Argus of Widnesday.

A shocking accident imposed on Wednesday on the Victorian rallway. A shunter maned William if Carthy was run over by the pilot-engine, near the Echnoa goods shed, and both his legs were so fearfully mangled that they had to be amputated by Mr. R. Crossen, surgeon, just below the knees. MrCarthy was cleaning, the points on the main line when the accident occurred. He was called to, and the whistle of the engine was blown to warm him off the limit but from Same unexplained cause he did not hear the signal suntil it was too late. The man's body was throughout between the rulls, otherwise he would have been killed. He is an old employee of the Government, and a single man. He is spoken of by his superiors as a most fathful and trustworthy servant.

A most disastrous rallway secident happened on Wednesday morning on the Echnes line, immailately below in Epsom racecourse, Sandhurst. A goods train had left the Sandhurst station at 4.45 a.m., consisting of 3 trucks, two passenger carriages, and a guard's van. The train reschad in active the crossing opposite Mr. J. Holdsworth's rest, dence, and at this point the engine-driver, J. Henderson, shut off steam, as the train, was about to proceed down an incline. After travelling about half a mile the train reached approach of the limits of the limits

It appears that on the road from Cooktown to the Palmer River the remains of three horses were found, and further on the police came to a spot where the men had evidently been murdered and portions of wasted human skin and burnt hair were found.

Work at the mines has been brisk during the month paget. At the Hill End claims unusual activity has prevailed. A larger amount of gold has been received, tating that the rooms of Messrs. Richardson and Wrench's, Pitt-street, to consider the matter. Mr. T. Buckland, occupied the that the city and suburbs should be connected with a suitable style of steam tramway, "—which was carried unanimously. The following resolution, also moved by Mr. Ferguson, was carried,—"That a committee be appointed to take into consideration the objects of this meeting, it is desirable route the tramway should take, its nature, the probable cost, the capital of the company, and any other subject of interest in connection with the matter in view."

Coinage operations at the Mint also show a fallingoff. The total value of coin and bullion received for
coinage purposes was £1,651,292 against £2,128,517 for
1875. Of the precious metal dealt with last year,
Queensland is represented by 262,177 oz., New South
Walcs by 153,531 oz., and New Zealand by 14,245 oz.
Adding last year's operations to those previously published, it will be seen that from the opening of the
Mint, in May, 1855, up to the 31st ultimo, the quantity
of gold received for coinage was 10,787,761-075 oz.,
valued at £41,571,393 16s. 2d.

In commercial matters nothing has transpired calling for special mention. Trade, if not brisk, has been
moderately active and sound. With Queensland,
New Zealand, and South Sea Islands, it is steadily
increasing.

New Zealand, and South Sea Jalands, it is steadily increasing.

A dull month has been passed in the Stock and Share market. The only investments for which a really strong demand existed has been Government securities, of which hardly any were obtainable, though unprecedentedly high prices were offered. A number of local companies held their half-yearly meetings in the end of January. The result of their operations have been satisfactory on the whole as may be imagined from the dividends declared for the six months. The principal of these were, Commercial Bank, 12½ per cent.; City Bank, 4; Joint Stock, 6 and is, per share bonus; Mercantile, 6½; Wallsend Coal, £1 per share; Bulli Coal, £1 per cent.; A. S. N. Co., 4; Brisbane Tin Co., 1s. per share; Clarence and Richmond Steam, 5s. per share; Australian Gaslight, 7½ per cent.; Shale Oil, 5; General Assurance, 7½; Pacific 5.

Banks.—The prices ruling to-day are all higher than they were a month ago. There has been some disposition to attempt liberties with the value of New South Wales, which had advanced from 50½ to 51½, and were then sent back again to 50½ on three occasions, only to return to the higher price new day. City have risen to 9½, sales; Joint Stock to 13½, both ex. d. Commercial sold at 95 after the half-yearly meeting, then tell to 94, and remain. Mercantile are firm at 6½, for old. National of Queensland are worth 5½. New Zealand were offered at 19½, but had no buyers. Unions are not being offered. The latest sale was at 56½.

DEBENTURES.—The market is so bare of New South DERENTURES.—The market is so bare of New South Wales or Queensland Government securities that holders of trust moneys find a great difficulty in obtaining investments. 108½ would be paid for long-dated fives. Sales of Queensland fours at 95½, and of Victorian sixes, having only six years' currency realised 105½. City of Sydney sixes changed hands at £102 11s. to £104; the former figure was paid to the Corporation for £10,000 worth.

INSTRANCE.—Increased attention has been given to this class of investments, and prices are raine.

Corporation for £10,000 worth.

INSURANCE.—Increased attention has been given to this class of investments, and prices are rasing. General cannot be bought under 45s. Mutual sold at from 3s. 11d. to 4s. 2d.; Pacific have gone from 24s. 6d. to 27s. 3d. within a fortnight, Uniteds from 19s. to par, and Sydney Marine, from 13s. 6d. to 14s.

Garioht.—No recent sales. Fully paid are held for 16\frac{1}{2}, new issue for 10\frac{1}{2} ex d.

Stram.—A slight improvement has taken place in Australasian, which have now buyers at 17\frac{1}{2}, sellers at 17\frac{1}{2}. Clarence and Richmond are offered at 6\frac{1}{4}; Hunter River at 7\frac{1}{2}. Sales of Illawarra at 5\frac{1}{2}.

Minno.—The gradual recovery of a portion of the decline in Wallsend Coal has been the most noticeable change recently. They fell to 13\frac{1}{2} cum div. of 20s., and are now firm at 14\frac{1}{4}, ex d. Bulli sold at 14, and are offering at 5s. less; Waratah have buyers at 9\frac{3}{2}. Copper quiet; South Cobar have been enquired for, and the market was cleared at 7s. 3d.; Peak Downs offered at 8s. 6d. Shale and Oil declined from 20s. 9d. to 19s. 9d. For gold shares there are no buyers except at nominal rates.

The course of sales between January 25 and the 8th instant, has been:—

THE KAPUNDA—The Kapunda, from Plymouth the 21st November, has made a splendid run of seventy-six days. She has had one geath (an infant), and three births during the passang E. Mills, an ordinary scamma, fell from the foretopmast crosstrees. In his descent he struck the forerard arm, then wint overboard, and was seen to sink abreast of the mizzen ringing. A boat was get ready, and the ship rounded it, but no signs of the unfortunate man tould be seen. A very beavy sea was running at the time. The ship has surved in excellent condition. At the termination of the voyage a very flattering address was presented to Caplain Adey by the passengers, who have arrived in excellent health.

imited in the aggregate to the amount of the useful
capital, and to invost such maneya, together with the durecapital, on fixed mortgages of real property in Anstealed,
including town and agricultural freshold estate, also on
pastoral runs, live stock, and wool.

The head office is in Melbourne, and the directors have
power to appoint agencies and local trustees wherever it
may be considered advisable.

As soon as practicable, a Board will be formed in London,
and a branch opened for the sale of shares on the London,
Register, the receipt of deposits, and the issue of debantures, and also for condusting first: isl agency business
between London and the Australasian colonies.

The Trust and Agency Company of Australasia, established on a similar principle, and lending money on like
securities, has paid dividends of twenty per coul, per annun
daring the last fourteen years, and created a reserve fund
of \$36,000. Their shares of £10 each, £1 paid, have snod

COMET KEROSENE OIL.—The demand for the above favourite brand of KEROSENE OIL having coMET KEROSENE OIL.—The demand for the above favourite brand of KEROSENE OIL having steadily increased to an extent greatly in excess of all former production, large additions to the Company's Oil formers, which thereby came nocessary, have lately been completed, and further additions; on an extensive scale, are now being vigorously pushed forward. The Company are now in a position to offer their manufacture for immediate delivery, or to make contracts for forward deliveries, in accordance with their usual terms of sale, particulars of which may be obtained at the Company's office.

The quality of the COMET OIL is well known throughout the colony; in illuminating power it is superior, in padoty it is very much so, to any other oil offered; and the fact that it leasts much longer in burning than any kerosene oil known in this market renders it the cheapest Light to be consumer.

HAVE YOU BEEN LATELY TO THE ROYAL FURNISHING ARCADE?

If not, you will be both surprised and delighted with the improvements which have lately taken place, not in expensive new buildings and costly alterations, which you would have to pay for indirectly, but it the vast new and cheeply bought stock of all kinds of furnishing merchandise, not imported directly from European manufacturers, but purchased from the consignees and importers resident in Sydney at a material discount from the British and Continental factory prices. The LOSS and RESPONSI-BILITY of OVER-TRADING of course recoils principally upon the exporters on the other side of the world who have unwisely temporarily overstocked this market; whilst we on this side are heavy gainers by getting our English, French, and German manufactured furniture, our beauful Bohemian, Parisian, Viennese, Hungarian, Swins, Berlin, and other noted cities and countries superbly designed lustres, pairs and suites of mantelpiece, and sideboard ornaments in wonderful variety, comprising an astonishing display of true artistic genins, at prices hitherto unheard of.

The lion's share of these cheap goods has fortunately fallon into the hands of the proprietor of the ROYAL FURNISHING ARCADE, who now, under the true and legitimate principles of business, vic.

P. S. COLLIS BROWNE'S CHLORODYNE.—
Vice-Chancellor Sir W. PAOE Wood stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the inventor of Chlorodyne, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—Tines, July 13, 1864.

Dr. J. Collis Browne's Chlorodyne.—The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in cholera was Chlorodyne.—See LANGET, December 31, 1884.

Dr. J. Collis Browne's Chlorodyne "is prescribed by scores of orthodox practitioners. Of course, it would not be thus singularly popular did it not 'supply a want and fill a place."—MEDICAL TINES, January 12, 1866.

Dr. J. Collis Browne's Chlorodyne is the best and most certain remedy in coughs, colds, asthma, consumption, neuralgia, rheumatism, &c.

Dr. J. Collis Browne's Chlorodyne is a certain cure in cholera, dysentory, diarrheca, colica, &c.

WONDERFUL CURE ON ULCERATED SORE LEGS OF 18 YEARS' STANDING.

Messrs. C. Mussby and Company, Pharmaceutical Chemists, Gosport, write as follows:

"Sir,—We have received the enclosed testimonial and have much pleasure in forwarding it to you. As he obtained the medicine from us, we can vouch for the truth of his statement."

une measureme roun us, we can vouch for the truth of his statement."

"27th February, 1875.

"I. Charles Luker, keeper of the Royal Engineers' Office, at Gosport, having had ulcerated sore legs for the last 18 years, which broke out while stationed at the Cape of Good Hope. Since my return to England I have tried everything in the way of patent medicines I could hoge of, and have had the best advice, both in Government and private hospitals, but obtained no permanent relief; on hearing, three months ago, of your medicines, I was induced to try them, and wonderful to relate, anter having taken one large bottle of Blood Mixture, and applied two 4s 6d pots of your Miraculous Salve, my legs are perfectly healed.

"You are at perfect liberty to make what use you like of this, as I think all who suffer from similar diseases should try the same.

Witness-W. J. Sparrow. To Mr. F. J. Clarke, Lincoln."

CURE OF RHEUMATISM AND SCORBUTIC ERUPTION.
"The Elma, North Cheam, Surry, S.,
"4th March, 1875. Sir,—I had been suffering from rheumatism for several years, together with the scorbutic cruption of the skin of a local nature, about the size of the palm of the hand, and was induced to try your Blood Mixture in consequence of two gentlemen in my neighbourhood having been cured of obstinate sores on the body. After taking two bottles I became much better, and confined it up to the tenth bottle, when I found the rheumatism had left me, and my arm was healed. I consider it a most valuable medicine.

WONDERFUL CURE OF A VERY BAD BREAST.

"48, Overnewton-street, Dumbarton Road, Glasgow,
2nd January, 1875.

"Dear Sir,—I am glad to inform you that my wife is cured
of a very bud breast, of 17 years standing. She tried
some of our head doctors in Newcastle, and many
others in the North of England, and was told that she
would never get better. But thanks to you Blood,
Mixture. She was very bad at times, and could do
nothing for the last two years. At last, being persuaded to try your Blood Mixture, she took seven
bottles, and is at this time, thank God, as well as ever
she was in her life. You are at liberty to make any
use of this you please.—I am, very respectfully yours,
"ROBERT LITTLE, a working man."

SKIN DISEASES, eruptions, blotches, spots, pimples, pustules, boils, carbuncles, ringworms, scald heads, sore eyes, erysipelas, itch, scurfs, discolourations of the skin, humours and diseases of the skin of whatever name or nature, are literally carried out of the system in a short time by the use of this world-famed medicine.

medicine.

IMPORTANT ADVICE TO ALL.—Cleanee the vitiated blood whenever you find its impurities bursting through the skin in pimples, cruptions, or sores; cleanse it when you find it obstructed and singelish in the veins; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

CLARKE'S WORLD-FAMED BLOOD MIXTURE is sold in bottles. 22 64 each, and in cases containing six times the quantity, 11s each—sufficient to effect a permanent cure in the great majority of long-standing cases.

AUCTION SALES.

NEW SOUTH WALES.

IMPORTANT and UNRESERVED SALE PURE-BRED SHORTHORN CATTLE, the property of
WILLIAM LEE, Esq., Milbank, Bathurst,
msequence of the continued impaired health of that
gentleman.

NO RESERVATIONS OF ANY KIND WILL BE MADE.

These form a division of the herd of pure-bred cattle of the late William Lee, Esq., who for fifty years successfully troduced the best blood procurable.

AT THIS SALE NO ANIMAL WILL BE DEFERED BUT WHAT CAN BE GUARANTEED PURE BRED.

Day of Sale— TUESDAY, March 27, 1877, at 11 o'clock, at the Kelso Yards, near Bathurst.

THE UNDERSIGNED are favoured with instructions from WILLIAM LEE, Esq., to sell by public auction, on the above day.

THE WHOLE OF HIS STUD OF PURE-BRED SHORTHORN CATTLE, comprising in all 139 HEAD, as follows:—

as follows:—
36 cows, over 4 years old
12 cows, 4 years old
8 cows, 3 years old
21 heifers, between 2 and 3 years
20 heifers, between 1 and 2 years
12 heifers, under 12 months
1 stud bull, "Imperial Theodore"
2 bulls, 3 years old
4 bulls, 2 years old
4 bulls, 1 year old
8 bull calves

About 50 of the Cows and Heifers are in calf to the pure red bull Imperial Theodore, a rich roan, calved Septembe

The actioners assure intending purchasers that this is a fall division of the pure stock of the late William Lee, Rsq., the prestige of which will beer favourable comparison with any head of stad stock in the colonies. Traces of the "Lee" blood can be seen in almost every herd of importance. As this sale will be a clearance and not an Annual Sale, it is suggested that such a chance of purchasing pure stock can rarely occur.

The late William Lee, Esq., nearly 50 years ago, imported some choice cows, which form the basis of those now to be sold, and up to the present time have been well and carefully improved by direct importations of the MOST FASHIONABLE BLOOD.

No reserve at this sale.

To prevent any mistake, intending purchasers are assured at no stock will be put in for sale, and nothing offered it can be guaranteed all this advertisement alleges.

the sabout 450,000 acres, and the carrying capabilities are moderately estimated at from 20,000 to 25,000 head of cattle, or their equivalent in sheep.

There is a steady and increasing demand for fat cattle, which are readily salable at the Station Yards, at £7 for bullocks and £6 for cows.

THE STATION is efficiently worked at a very moderate cost, and, owing to abundance of feed and water, &c., cattle are rarely if ever found off their own country, which also materially lessens the cost of management.

THE IMPROVEMENTS are all good and substantial, and capable of working a much larger number of cattle. The Auctioneers would desire to direct attention to the fact that the proprietor is only disposing of this splendid property owing to his intended early departure for Europe; and this, added to the very high character of both the country and the stock, should be an inducement to capitalists seeking investment, as so favourable an opportunity is seldom to be met with.

Further particulars can be obtained on application to lessrs. R. GOLDSBROUGH and CO., Melbourne; or to MAIDEN, HILL, and CLARK, 171, Pitt-street, Sydney. LARGE AND VALUABLE SUGAR ESTATE FOR SALE.

"The business of the day was most exciting. I was to ride over the fine open country to the westward of Mount Abadance, and thence back for a higher branch of the river, or for a river, confident that so fine a region could not be deficient in water, but more confident from what I had seen of the range to which we had approached so near. Riding to the N.N.E., in about two hours we came upout the identical river we had so long followed up. It was accompanied as usual by the Acacia pendula, had its rounded bergs, reedy waterholes, and open strip along the left bank. Crossing if, I rode over towards an elevated part of the open downs, in hopes to obtain a sight of what the country was beyond; but I found that to be impossible, as it seemed boundless. So, turning, I assended an elevated north-easterly extremity of Mount Abundance.

AND FROM IT BEHELD THE FINEST COUNTRY I HAD EVER SEEN IN A PRIMEVAL STATE—

a champaign region, spotted with wood, stretching as far as human vision or even the telescope could reach. It was

That beautiful and substantial residence, the property of C. K. Moore, Eag., and known as a Calendar and convenient arrangement (apart from kitchen, laundry, and other out-offices), surrounded by a stately versandsh, and occasional balconies on the upper foor.

The principal portal opens into a graceful vestibule, the columns of which, surmounted by arches, reach the corridor everhead, approached by massive baronial staircase. The sides of the vestibule are disposed in entrances to the traving-room, dining-room, library, and breakfast-room, and terminates in the hall leading to pantries, larder, buda's room, and the many convenient domestic departments in that portion of the establishment.

Immediately beyond the colomnade is an antechamber separity fitted as a superior lavatory and clock-room. The upper floor is whelly devoted to inxuriously spacious elecping apartments, costume, bath, and dressing rooms, and the surbes arrangements of the interior display a taste seldom spatiled, back and variegated, and all material in its construction supplied by the respective trades imported specially from the first houses in England.

Gas and hot and cold water are everywhere throughout the stiffee.

The coach-house and stables are faultiess: while the landry and kitchen, &c., in themselves present a charm to be gasted.

of 50 feet, by depths varying from 150 to 230 feet.

These elevated and choice building sites are in the market for positive sale, and the Auctioneers direct specia attention to the fact, that this is the first opportunity that has yet been offered in this locality to secure land & ACCESSIBLE, so ELEVATED, and so SUR-EQUINDED.

ACCESSIBLE, so ELEVATED, and so SUR-ROUNDED.

In a very little time, with a growing population, this land will doubtless become too valuable for private residences, and must be used for business purposes. Special attention is therefore respectfully directed to the prospective as well as to the present value of this land.

The natural lay of the land is a gentle slope, thus draining the entire block.

The valuable properties and grounds of RANDOLPH NOTT, DONALD VERNON, and JOHN WILLIAMS, Esqrs., are opposite and near to this land.

Further information may be obtained from the aprior to the day of sale,
